

# 180SB Series

PORTABLE SWINGBLADE SAWMILL

WORLDS MOST VERSATILE PORTABLE SAWMILL

## A COMPLETE WOOD PROCESSING SOLUTION

Featuring a proprietary 180° SwingBlade, the 180SB is capable of processing entire logs into S4S lumber and value added products- without moving or turning the log. Designed for safe operation, one-man portability, easy maintenance and repair, the D&L 180SB portable sawmill provides greater capabilities with a lower cost of operation over traditional mills.

- ▶ 180° Cutting Capability
- ▶ Multiple Attachments
- ▶ Cost Efficient
- ▶ One Man Operation
- ▶ Robust Design

### 180° Swing Capability

The D&L 180° swingblade allows for safe double cutting wide planks, beams and cants, processing logs from either side. The optional Radial MultiCatch system allows for accurate, consistent angle cutting by allowing you to quickly and accurately set the blade height and depth at any angle.

### Blade Technology

The unique D&L Six Tooth Carbide Tipped ThinKerf blade makes accurate and smooth cuts and is second to none in the industry. Sharpening can be done in place and in minutes using the accompanying diamond sharpener. Ideal for both soft and hard woods and in use around the world. Insertable tooth blades also available.

### Unequaled Versatility

There is more to processing a round log than just producing boards. The 180SB edges as it cuts, and has a variety of easily changed, optional implements including a slabbing bar, planer blade, orbital sander, router and drill attachment. Easily produce dressed and edged, pre-drilled timber products, with chamfers and grooves.

All things considered, why does anyone buy a band saw? Thanks again D & L, for manufacturing this unique and versatile portable saw.

## PERFORMANCE DRIVEN DESIGN

The D&L 180SB Series is manufactured with stainless steel and aluminum for maximum portability and durability.

Quick repair and replacement using off the shelf parts eliminates unnecessary downtime.

The unique guard design protects the operator at all times and swings with the blade.

A double riving knife follows the blade to prevent entering the cut backwards when doublecutting.

The modular, lightweight, maintenance free rail system features easily adjustable feet and 7'-6" extensions.

Additional value adding attachments can be purchased for all models.

Carriage comes fully assembled.

The 180SB is available in multiple sizes and models to fit your requirements.
