- ▶ Modular Design
- ▶ Expandable
- ▶ Extra Strands Available
- ▶ One Man Operation
- ▶ Robust Design
- ▶ Hydraulic's are run off of the mill

PERFORMANCE DRIVEN DESIGN

The D&L Live Hydraulic Log In-Feed Deck is manufactured with heavy duty steel construction in a modular design for maximum portability and durability.

Quick repair and replacement using off the shelf parts eliminates unnecessary downtime.

This portable modular system features easily adjustable stand width for different length of logs.

The Advantages

Stop and go loader arms loads one log at a time.

Modular Design

Each strand is built individually creating a modular design that can be assembled on site and expanded to what ever width deemed necessary.

Enhances Productivity

The ability to load individual logs directly from the mill with out any hands on dramatically increases the productivity of the mill by thirty percent.

A HISTORY OF EXCELLENCE

7800 SOLD WORLDWIDE

Having implemented our proprietary 180° swingblade solution, for both portable and commercial sawmills, as well as accessories, equipment and custom shop solutions around the world, our customers always have trusted the quality and reliability of D&L.

68 YEARS INDUSTRY EXPERTISE

Formerly D&L Doublecut Sawmills Ltd., our design and manufacturing process is the result of 3 generations of sawmilling. Our knowledgeable staff can assist in choosing a portable or stationary wood processing solution that perfectly meets your needs.

2 YEAR LIMITED WARRANTY

All D&L products are backed by two year limited warranty. Our mills are extensively tested and rigorously designed for performance and reliable operation in any environment. We use our own products everyday and are proud to stand behind them.
